Professional Summary

Aspiring Backend Developer with expertise in Java, Python, Flask, Django, and MySQL, focused on building scalable APIs and AI-integrated applications. Experienced in designing optimized database systems and integrating AI models into real-world solutions. Seeking a software development internship to contribute to high-performance backend systems.

Experience

AI Developer Intern Sep 2025 – Dec 2025

Mayfly Technologies, New Delhi

- Developed AI-based product features across *Nuri: AI Therapy*, *RewireBuddy*, and *Star Premium Calculator*.
- Contributed independently to real-world projects, meeting deadlines while adhering to confidentiality agreements.
- Gained hands-on exposure to product lifecycle workflows in a product-based startup.

Sewak (Volunteer) Present

SelflessSewa, New Delhi — Actively contributing to community-driven social initiatives and volunteer-led programs.

Education

Master of Computer Applications (MCA) 2025 – 2027

Banasthali Vidyapith, Rajasthan

Bachelor of Computer Applications (BCA) 2022 – 2025

Institute of Management Education, New Delhi

Technical Skills

Languages	Java, Python, C, C#, HTML, CSS
Backend	Flask, Django, Django REST Framework, REST APIs, JDBC, JWT Authentication
Databases	MySQL
Tools	Git, GitHub, Postman, VS Code, Eclipse, NetBeans
Concepts	Data Structures & Algorithms, OOP, DBMS, OS, System Design

Projects

AI-Powered Vedic Human – Yog at Ease Jan 2026 – Apr 2026

Flask, Python, MySQL, REST APIs, JWT Authentication

- Designed scalable backend APIs handling concurrent requests with optimized response time.
- Implemented JWT-based authentication for secure session management and user tracking.
- Optimized MySQL database using indexing and normalization; integrated AI-based recommendation system for personalized wellness plans.

Fuel Route Planner API 2026

Django, Django REST Framework, Python, REST APIs, MySQL, OpenStreetMap

- Developed scalable backend API for fuel-efficient route planning and fuel stop optimization.
- Built RESTful APIs using Django REST Framework for route summaries, fuel costs, and nearest fuel station recommendations.
- Integrated OpenStreetMap geolocation for route calculation; implemented fuel cost estimation using Python and structured CSV datasets.

Travel Management System Jul 2024 – Sep 2024

Java, JDBC, MySQL

- Built desktop-based booking system with secure authentication and end-to-end booking flow using JDBC.
- Designed relational database schema for managing travel routes, bookings, and user data.

Certifications & Interests

Django Backend Development Assessment (2026) — Proficiency in Django, DRF, API design, and backend architecture.

Interests: Backend Engineering • System Design • AI Applications • Open Source Development
